● Electricity

- **In case of using the Rental Display System, it is not required to submit "Electrical Service (Ⅰ)".**
- The Rental Display System includes basic electrical service. In case you need extra lighting, it is required to fill in **"Electrical Service (Ⅱ)"** to apply.
- If you require extra lighting, note that the additional primary wiring and branch circuit construction is required, regardless of the current wiring circuit construction and electrical consumption.
- Exhibitors are requested to refrain from bringing their own lighting equipment to avoid any electrical trouble on site. If there are any other items you require, contact the official contractor directly.
- Total price is calculated by adding the amount in (A), (C) and (D). Amount in (C) and (D) depend on the wattage of the lighting equipment you order.
- Amount indicated in (C) includes both construction and electricity consumption charge.
- Amount in (C) and (D) will be automatically charged according to the equipment you order. The period or the span in which the electricity is consumed is irrelevant. e.g. Either when the electricity was consumed from 8:00am (move-in time) or from 10:00am, the amount charged in (C) and (D) will be the same.

Rental Lighting Equipment Catalogue

1 Fluorescent Lamp

JPY5,445

2 Spotlight with arm

Light bulb color: JPY6,655

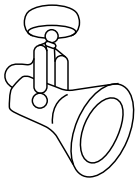

Daylight color: JPY6,655

3 Spotlight

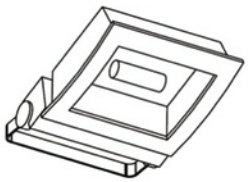

Light bulb color: JPY6,050

Daylight color: JPY6,050

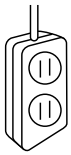

4 LED 30W (Daylight Color)

JPY13,310

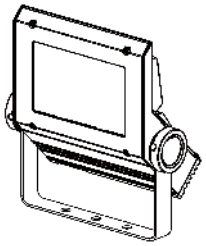

5 Outlet 100V up to 1.5kW

JPY4,598

6 LED 60W (Daylight Color)

JPY21,780

*10% consumption tax included.
*Order these equipment by submitting the form **"Electrical Service (Ⅱ)"**.

MUST SUBMIT
